SYMBOL LEGEND

Look for these helpful icons throughout the catalog.

Identifies value pack.

Assembly required.

Products that must be shipped freight.

Identifies items that cannot be returned.

Meets or exceeds ANSI/BIFMA standards for safety and durability.

Products made with at least 10% total recycled content.

Requires additional delivery time; limited availability.

Indicates vacuums that have received the Carpet and Rug Institute Seal of Approval/Green Label Certification. The CRI's seal identifies only those vacuums that meet strict performance standards for soil removal, dust containment and wear to the carpet, as verified by independent laboratory testing.

Products that meet the recovered materials content ranges specified by the EPA through the Comprehensive Procurement Guideline (CPG).

Identifies products third-party tested for environmental responsibility.

Because there is no universally accepted standard to designate products as environmentally preferable, we have adopted the green leaf symbol to highlight products that have one or more of the following attributes: reduced VOCs, compostable, biodegradable, contains recycled content, or other environmental attributes that make this product¹ less harmful to the environment or humans, when compared to its traditional counterparts. Many of the products marked with the green leaf symbol have been endorsed by third-party certifying organizations, and where applicable, the certifying body's logo appears next to the product's name. Please note that we have not independently verified the environmental attributes. ¹These environmental attributes refer to the products themselves and not the processes for manufacturing and transporting the products.

GLOVE PROTECTION GUIDELINES

Facts and Tips about Gloves:

- Gloves protect your hands from the following workplace hand injuries: sharp objects, abrasive surfaces, moving components, wet environments, chemicals, blood-borne pathogens and viruses.
- You must follow a safe procedure for removing gloves so soil, chemicals or viruses do not come into contact with your hands. Remove one glove from top to bottom with the other gloved hand. Then, tuck the first glove into the other gloved hand and peel off the second glove from the inside.
- The glove cuff style is an important consideration based on the protection needed. Some cuffs will allow the glove to be removed quickly or allow ventilation.
- There are several standards and ratings for cut-resistant and coated gloves (i.e. EN, ANSI, ASTM, etc.). Compare similar standards when choosing gloves because ratings can be determined based on different testing methods.
- If you have an allergy to latex or rubber, look for gloves that contain no latex such as vinyl or nitrile.

Size and Fit Matter:

Size and fit are very important to properly protect your hands. Poorly fitted gloves will not be worn and increase the chance for hand injuries.
 Too small: make hands fatigue while providing less dexterity and decrease productivity
 Too big: more likely to get caught in moving components and not have proper dexterity
 Measure your dominant hand with a tape measure around the palm and knuckles.
 Here are some general guidelines for men's sizes.

7.5 – 8" – Small 10.5 – 11" – X-Large
 8.5 – 9" – Medium 11.5 – 12" – XX-Large
 9.5 – 10" – Large

General guidelines for women's sizes.

6" – X-Small 7.5" – Large
 6.5" – Small 8" – X-Large
 7" – Medium

Questions to Consider When Buying Gloves:

- In which task or application will you be wearing gloves for protection?
- What types of gloves do you use? Why?
- What types of hand injuries happen in your work area?
- What do you like or dislike about your gloves?
- If you can change one thing about your gloves, what would it be?
- What are the costs of the gloves you have purchased recently?

Gloves by Application:

- **There is no one glove that will fit each job or situation. Assess the job and protection needed to purchase the right glove.**
 Below is a chart that shows the types of gloves commonly found in various applications.

GLOVE TYPES AND ATTRIBUTES

Unsupported: (Chemical Protection)

(Disposable and Multi-Use)

Reliable and economical protection.

Materials: Butyl, Latex, Neoprene, Nitrile, Vinyl.

Uses: Small part handling, food handling, medical and lab use, manufacturing.

Attributes: All latex, vinyl and polyethylene disposable glove component materials comply with relevant federal regulations for food contact. Many are Medical Grade, Class 1 Medical Device approved. Nitrile and vinyl are great alternatives for those with latex allergies. Ideal for tasks when greater dexterity is needed.

Supported: (Chemical Protection)

(Cut/Sewn, Dipped and Cut Protection)

Materials: Butyl, Neoprene, Nitrile, PVC.

Uses: General cleaning, chemical processing.

Attributes: Delivers a varying degree of cut protection and enhanced grip.

Leather: (Leather Palms, Drivers and Welders)

Provides durability, dexterity and comfort.

Uses: General and medium-duty tasks.

Attributes: Leather palms (shown left) are a popular type of leather glove.

Lined leather gloves provide added warmth in cold environments.

Cotton: (Canvas, Jersey and Terrycloth)

Cotton material is cut and sewn together in glove pattern.

Uses: These can keep hands clean and protect against abrasions, but may not be strong enough to handle work with rough or sharp materials.

Attributes: Good abrasion, some with enhanced thermal protection.

Strings: (String Knit, Dipped and Cut Protection)

Fibers are knitted together in glove pattern.

Uses: Light-duty tasks.

Attributes: Allows hands to breathe and reduces perspiration. Provides protection and dexterity. Can be used as a liner for extra protection. Coated/Dotted knits also provide extra grip.

Coated or Dipped Seamless Knit:

(Ninja, Flex, Tuff, UltraTech and Memphis)

Glove is dipped in a polymer coating for added protection.

Uses: Some chemical handling, cleaning, oil refining, food processing.

Attributes: Coatings protect against solvents and chemicals, abrasions, punctures and cuts.

Cut Protection: (Supported, Strings and Synthetic)

Protects hands from sharp edges such as blades, glass, metal, ceramics, etc.

Uses: Medium to heavy-duty tasks.

Attributes: Materials can vary, such as Kevlar®, Dyneema® or composite yarns (HPPE). Not effective in protecting against punctures or power equipment.

Multi-Task: (Leather, Synthetic and Cotton)

Extra material offers more protection.

Uses: Tasks that require superior or specific area protection but with dexterity, grip and working with small parts.

Attributes: Offers specific protection areas and materials depending on the particular task.

GLOVES

European Directives for Personal Protective Equipment

European Standard EN388 established the criteria necessary for rating all PPE items. Many of our hand protection offerings meet these standards – reflected with the CE logo – and have a 4-digit performance rating that measures abrasion, cut, tear and puncture resistance (ACTP).

A glove's overall performance score is indicated by four numbers that represent the four test criteria. The higher the number, the better the performance. Manufacturers may use an X to indicate not tested.

Criteria	Rating
A Abrasion Resistance	0-4
C Blade Cut Resistance	0-5
T Tear Resistance	0-4
P Puncture Resistance	0-4

PROTECT YOUR EYES!

Personal protective eyewear, such as goggles, safety glasses and faceshields, must be used in a workplace where an eye hazard exists.

Each day approximately 2,000 U.S. workers sustain an eye injury on the job that requires medical treatment. A third of the injuries are treated in ERs and more than 100 result in a day or more of lost work. The majority of injuries occur because of small particles or objects striking or abrading the eye.

Having the right protective eyewear is critical in preventing eye-related injuries.

Before choosing eye protection, identify the hazards of your workplace. Then, the choice can be made between safety glasses, goggles or a combination with a faceshield as secondary protection.

Eye protection should be fit to the worker or adjustable to provide for appropriate coverage. The worker's personal vision should be considered, with safety glasses large enough to allow the user to wear their own glasses underneath.

www.cdc.gov/niosh/topics/eye

Eyewear Types

Safety Glasses protect against general impact; however, speed of impact must be considered. The higher the velocity, the more likely the safety glasses could be dislodged. In this case, goggles or a faceshield may be a better choice. **See pages 322-326.**

Goggles are available in direct and indirect vented styles. **See pages 326-327.**

Direct vented goggles allow airflow, but are only approved for protection against particulates. Use for jobs such as grinding or cutting where dust is an issue.

Indirect vented goggles are for protection against vapors, chemicals, liquids and dust.

Full Faceshields are the best option for workers exposed to flying particles or chemical splashes. Use in conjunction with safety glasses or goggles to protect against secondary hazards. **See page 328.**

Eyewear Features

UV Protection—for workers exposed to ultraviolet radiation, such as outdoor workers and welders.

Hard-Coated—for applications where lens scratching is an issue.

Anti-Fog/Anti-Mist—for workers who are exposed to extreme temperatures or warm humid environments.

Clear Lenses—for indoor or outdoor applications in below-normal light conditions.

Gray or Brown Lenses—for outdoor use where above-average light is available.

Amber Lenses—for applications where light is below normal or enhanced contrast is needed.

SPILL MANAGEMENT

3M

A – C Maintenance Sorbents Lightweight, versatile, and takes just minutes to put in place. Dust-free and contains no abrasive granules that can damage expensive equipment. Can be incinerated or fuel blended, leaving less than 0.2% ash. Wring out and reuse numerous times with virtually no loss of sorbent capacity. Allows you to get at the source of a leak before it becomes a bigger problem.

A High-Capacity Maintenance Sorbent Pad Highly absorbent and nongranular so it's perfect for placing directly on machinery. Will not damage plant equipment. Low profile so it fits in tight places. Tuck it in or around machines to catch and contain leaks at the source.

B High-Capacity Maintenance Folded Sorbent Four sorbents in one. It can be used as a boom, pillow, pad, or roll, which means you stock one product to meet your sorbent needs. Perforations every 16 inches allow you to select the length required, so there's less wasted sorbent. Comes in a handy dispenser box for easy, on-site use. 3M's high capacity sorbent technology: has increased fluid-holding capacity which means less sorbent used; allows for simple reclamation for recycling of valuable liquids and re-use of sorbent; and minimizes sorbent waste for disposal.

3M WARNING!

FAILURE TO PROPERLY HANDLE AND DISPOSE OF SORBENTS CONTAMINATED BY HAZARDOUS MATERIALS MAY RESULT IN SERIOUS PHYSICAL INJURY OR DEATH AND/OR ENVIRONMENTAL HARM. For proper handling, consult the *Safety Data Sheet* for the material adsorbed, and applicable safety and health standards, contact your supervisor, or call 3M at 1-800-243-4630. To reduce the risk of serious injury or death, adequate precautions should be taken when handling or storing sorbents contaminated by hazardous materials, and appropriate personal protective equipment should be worn. Transportation and disposal of container and its contents must comply with applicable laws and regulations.

3M™ Maintenance Sorbents and 3M™ Petroleum Sorbents must not be used with aggressive liquids, including caustics, acids, oxidizers, and reactive chemicals.

3M™ Chemical Sorbents can adsorb most acids, bases, and other hazardous fluids. For further information regarding chemical compatibility, contact 3M.

Make Fire Safety a Priority!

Each year more than 5,000 people are injured in fires and explosions on the job.* Keep extinguishers within reach to safeguard your workplace. OSHA standards require employers to provide proper exits, firefighting equipment, emergency plans, and employee training. A fire safety program is critical for employee safety and facility compliance — make sure yours includes fire extinguishers and smoke alarms.

FISKARS®

A Pro Pruner An adjustable, ergonomic design provides comfortable use when cutting stems and branches up to 1" diameter. This pro-style pruner features adjustable blade tension to fit your hand strength and the toughness of the material you're cutting. Angled cutting head helps reduce wrist fatigue and makes it easy to prune at awkward angles. The fully hardened, precision-ground steel blade stays sharp, even through heavy use. A low-friction coating helps the blade resist rust and prevents the blade from gumming up with sap and debris, making cutting even easier. Built-in sap groove provides smooth operation. Convenient hanging hole allows for easy storage.

FIND THE TRUCK YOU NEED!

Truck Type

Features and Benefits

Cube Trucks

Use these durable and versatile trucks for a variety of bulky, load-carrying tasks including waste collection, material transport and laundry handling. Available in four capacities. Find these on page 478.

Tilt Trucks

These trucks maximize maneuverability and make it easy to dump contents. Ideal for handling bulky materials and loads that are medium to heavyweight. Insert wheels and the overall profile helps protect surroundings. Consider your need for the lid option. Find these on page 478-479.

Platform Trucks

Accommodate loads of varying shapes and sizes aboard a high-capacity platform truck. Depending on what you're moving, you'll want to look at support—more when you're loading multiple, hard-to-balance items—less when loads are more well-balanced. Some platform trucks offer work-height surfaces. Find these on pages 469-470.

Hand Trucks

Carry a surprisingly heavy load with ease and agility with a two-wheeled hand truck. Buy a model that's dedicated to this role, or combine functionality with a convertible truck that switches from a two-wheeled configuration to a four-wheeled platform. Find these on pages 468-469.

Convertible Trucks

Change configurations to use one truck for multiple applications. Some versions combine removable shelving with a more open platform truck option. Others provide support alternatives that adjust to the loads you're transporting. Find these on page 471.

B Tilt Truck Offers industrial strength construction to transport heavy loads with ease. These tilt trucks feature seamless one-piece molded truck bodies with a reinforced lip. The sturdy, plastic construction won't rust, dent, chip, or peel. 4-inch center swivel back caster provides easy maneuvering. 10-inch blow-molded polypropylene inset wheels protect surroundings. The dump trailer is constructed of a powder-coated steel frame for corrosion resistance. Easy to handle and maneuver through commercial doorways and onto elevators. The constant force design allows for controlled dumping by one person. Inset wheels protect walls, fixtures and patrons. The smooth surface is easy-to-clean and resists pitting and corroding. Optional domed lids are available (sold separately). Manufacturer's limited one-year warranty.

GET THE
RIGHT FIT

Using the correct can liner size is key to being cost-effective. Take a look at how bags fit each bin or can at your facility. If they hang over the edge of the receptacle by more than four inches, you are using too much bag for the job!

CAN LINERS

Use the sizing guide below to locate your waste receptacle. The right liner size is listed next to it.

The right size is important!

Ideally, you should have about three to four inches of liner overhang on your receptacle. Anything more or less is wasteful of both time and money.

LINERS FOR EVERY NEED!

Choose From Two Types of Plastics

Linear Low Density (LLD) — Tougher transport conditions require the superior tear resistance of LLD liners. This plastic is designed to perform in environments with higher risk of tears or punctures, either from the can liner contents, surrounding environment or through transportation to disposal units, as LLD does not tear easily, even after puncture. **Find these on pages 511-517.**

High Density (HD) — When greater puncture resistance and load capacity are the priority, select HD liners. Even with thinner construction, HD liner material delivers puncture and load benefits—performing well with waste that is heavy, such as unbroken glass, or other materials that do not have sharp edges. **Find these on pages 518-520.**

Strength Grade and Gauge

Strength grades are based on static load, also known as lifting strength. LLD and HD plastic materials achieve the same static load with different gauges; order your bags accordingly. Use this chart for easy reference to determine approximate gauge equivalents.

Strength Grade	LLD Mil Gauge	HD Micron Gauge
Light	.35 – .44	5 – 9
Medium	.45 – .57	10 – 12
Heavy	.58 – .69	13 – 14
Extra-Heavy	.70 – .89	15 – 17
XX-Heavy	.90 – 1.14	—
Super	1.15 – 1.39	—
Super-Heavy	1.40 – up	18 – 24

Light—Use for crumpled paper, cups and light waste.

Medium—Appropriate for packaging waste, wet paper and similar mixed trash.

Heavy—Choose for light wood, metal scraps and wet cardboard.

Extra-Heavy—Select for use when trash is consistently heavy, wet or sharp.

Super/Extra-Heavy—Use on the heaviest cleanup jobs, in warehouses, cafeterias, or facility grounds.

Capacity

Know the capacity of your receptacles and select the bag or liner to suit. Bags and liners are available in a multitude of sizes; gallon capacity is listed with each item throughout this section.

Bottom Seals

Star-Seals — The most common type. Conform easily to any shape waste container, distribute weight evenly inside the bag and have the maximum carrying capacity.

Flat-Seals — Hold more volume than like-sized star seals. Appropriate for somewhat lighter weight loads.

Gusset-Seals — Another seal found in flat-style bags. Offer a good fit in certain receptacles and appropriate for somewhat lighter loads.

A Tall Kitchen Drawstring Trash Bags Drawstring bags are made strong and durable to help prevent trash disaster in the home and workplace. These kitchen garbage bags have reinforcing strength bands that make the trash bags stronger while using less plastic. They are reinforced at the top, middle and bottom. These drawstring bags are made with a unique diamond pattern that stretches around objects to prevent rips, reinforcing bands to add strength plus a thicker plastic for leak protection. The strong three-layer drawstring closure makes trash removal easy to lift, carry and toss away.
